

Recommendations for Propagation/Field Production

Propagation of this patented plant is encouraged. Propagates like Autumn Joy.

Cuttings should be approximately 2-3" and done in Spring

Keep the cuttings on the dry side.

Full sun to light shade is best.

We mulch with sand in the field to keep soil off the foliage and keep leaf spot diseases to a minimum.

We have seen a 2% reversion to green. These should be rouged accordingly.

Recommendations for Potted Production

Pot in Spring to early Summer for Fall/Spring Sales

We top dress fertilize both in containers and in the field.

Licensing Fees

Based on company (licensees) yearly sales.

Small - under 1 million in sales	\$100 includes 70 cuttings
Medium - 1 - 2.5 million in sales	\$200 includes 140 cuttings

URC	\$0.50 each
Royalty	\$0.25 per plant sold

License includes use of trade name.

Call Brent for availability. 800-648-2788.

General Information

Light:	Full sun to light shade.
Soil:	Prefers well drained soil.
Height and Spread:	18"x18"
Hardiness:	Zone 4-9
Foliage:	Thin green edge with chartreuse yellow centers.
Bloom Time:	Mid September
Flower:	Russet red just like 'Autumn Joy' but later to color up

This plant is a sport of 'Autumn Joy'.

Due to the yellow variegation, aphids are very attracted to this plant. Some sort of preventative or maintenance program should be considered.
